

The Challenge of Thrombo-Inflammation in Cancer

The Interplay of Factors That Impact Outcome **CPD**

FRIDAY, 27 SEPTEMBER 2019

TIME: 18:30 – 20:00

VENUE: FIRA GRAN VIA, BARCELONA, SPAIN | ROOM: SALAMANCA AUDITORIUM, HALL 3

www.medscape.org/symposium/thrombosis-registration

Medscape
LIVE!

MODERATOR

Paris A. Kosmidis, MD
Head
Medical Oncology Department
Medical Oncologist
HYGEIA Hospital
Athens, Greece

Agnes Y. Y. Lee, MD, MSc, FRCPC
Professor of Medicine
Division of Hematology
Medical Director, Thrombosis Program
Director, Hematology Research Program
University of British Columbia
and Vancouver Coastal Health
Vancouver, British Columbia, Canada

PANELISTS

Paula Jimenez-Fonseca, MD, PhD
Medical Oncologist
Hospital Universitario Central de Asturias
Oviedo, Asturias, Spain

James S. O'Donnell, MB, PhD, FRCPI, FRCPath
Professor of Vascular Biology
Director of Irish Centre for Vascular Biology
Royal College of Surgeons in Ireland
Consultant Haematologist
National Coagulation Centre
St James' Hospital
Dublin, Ireland

Florian Scotté, MD, PhD
Head
Department of Medical Oncology
and Supportive Care
Foch Hospital
Suresnes, France

AGENDA

18:30

Welcome and Introduction

Paris A. Kosmidis, MD

Agnes Y. Y. Lee, MD, MSc, FRCPC

18:40

Inflammation and Thrombosis in Cancer: Partners in Crime?

James O'Donnell, MB, PhD,

FRCPI, FRCPath

18:55

Managing Patients With Cancer-Associated Thrombosis: Current and Future Clinical Challenges

Agnes Y. Y. Lee, MD, MSc, FRCPC

19:10

Moving From Biological Understanding to Clinical Solutions: A Case Clinic

Panel Discussion Moderated by

Agnes Y. Y. Lee, MD, MSc, FRCPC

19:55

Summary and Close

Paris A. Kosmidis, MD

Agnes Y. Y. Lee, MD, MSc, FRCPC

20:00

Adjourn

Dinner offered by Medscape

ACTIVITY OVERVIEW

Why do oncologists have a pivotal role in the optimal management of cancer-associated thrombosis? What do oncologists need to know about the biology and the clinical ramifications in order to make the right treatment decisions in the management of thrombosis across the continuum of care? The biology of thrombo-inflammation and the clinical implications, key clinical challenges, and essential practical guidance on optimal patient management will be covered by an expert faculty of oncologists and hematologists in this highly interactive and engaging symposium.

Commonly encountered cases from different tumor types will be used to discuss the optimal management of thrombosis in the context of the complex and changing dynamics of cancer management across the continuum of care. The aim will be to provide greater awareness and clarity on the role of the oncologist in the management of thrombosis and how to tailor and optimize treatment strategies for the individual patient during the course of their disease.

TARGET AUDIENCE

This activity is intended for oncologists and hematologists.

LEARNING OBJECTIVES

Upon completion of this activity, participants will:

- Have increased knowledge regarding the
 - Biology behind cancer inflammation and thrombosis, and the implications to management of cancer-associated thrombosis across the continuum of care
 - Current areas of unmet need and key challenges regarding use of anticoagulants in patients with cancer
 - Key available and emerging data that support and inform the use of anticoagulants in patients with cancer
- Demonstrate greater confidence in their ability to
 - Ensure optimal selection and implementation of anticoagulation in the individual patient across the continuum of care according to current guidelines and the available/emerging evidence

ACCREDITATION STATEMENT

WebMD[®] Global

The Faculty of Pharmaceutical Medicine of the Royal Colleges of Physicians of the United Kingdom (FPM) has reviewed and approved the content of this educational activity and allocated it 1.5 continuing professional development credit (CPD).
